1	RESOLUTION
2	
3	A PERCYNTERON AND A CALLEY WAS A LABOR OF THE ACAD
4	A RESOLUTION relating to the Cedar River Watershed, directing preparation of the Final Cedar
5	River Watershed Habitat Conservation Plan and other related documents necessary to
6 7	obtain an incidental take permit from the federal government under the Endangered Species Act (ESA); authorizing the Mayor to sign and execute the Final Habitat
8	Conservation Plan and related agreements; directing preparation of an ordinance providing
9	for amendments to the Secondary Use Policies and amendments to the budget of Seattle
10	Public Utilities; expressing intention to provide City funds to complete the Cedar River
11	Watershed Education Center; and directing the City Budget Office to submit a proposed
12	ESA funding policy framework to the Council.
13	
14	WHEREAS, the Cedar River Municipal Watershed has been the primary source of water supply
15	for the City of Seattle and neighboring communities for almost one hundred years; and
16	WHEDEAG 4 1 (4) 1 1 1 1 1 1 1 C 1 1 1 1 1 C
17	WHEREAS, throughout this one hundred year period the City has followed a policy of acquiring
18	ownership of lands within the watershed to enhance control of human activities and protect the high quality of the water; and
19 20	the high quanty of the water, and
21	WHEREAS, the City presently owns approximately 90,500 acres, virtually all of the land
22	upstream of its water supply intake facilities; and
23	True de la constant d
24	WHEREAS, the City Council passed Ordinance 114632 on August 7, 1989, approving a set of
25	policies, known as the Secondary Use Policies, for the use and management of the
26	watershed; and
27	
28	WHEREAS, the Cedar River Municipal Watershed and the lower Cedar River are home to many
29	species of fish and wildlife, some of which are listed as endangered or threatened under
30	the Endangered Species Act; and
31 32	WHEREAS, on March 14, 1997, the City reached Agreement in Principle with five Federal and
33	State agencies on major terms of a Habitat Conservation Plan (HCP) for the Cedar River
34	Municipal Watershed which would establish the City's long-term commitments regarding
35	watershed habitat protection and restoration and mitigation for impacts resulting from the
36	presence and operation of certain City-owned facilities, all in exchange for certain releases
37	and settlement of various water resource management issues with the other parties; and
38	
39	WHEREAS, on November 10, 1997, following public review and comment on the Agreement in
40	Principle and other information and analyses of the intended HCP, the City Council
41	adopted Resolution 29657 establishing goals for the Cedar River Municipal Watershed
42	and directing preparation of a draft HCP based on the Agreement in Principle and guided
43	by the adopted goals, and preparation of related environmental documents, implementing
44	agreements, and other technical information; and
45 46	WHEREAS, the City conducted more than 100 meetings, workshops, presentations and field trips
47	on issues and options related to the HCP prior to completing and releasing a draft HCP;
48	and

WHEREAS, in December 1998, the City released for public review a Draft HCP, a Draft Environmental Assessment/Environmental Impact Statement, detailed implementing agreements negotiated with the five Federal and State agencies, and related technical information; and  WHEREAS, the City conducted four public workshops and two public hearings attended by approximately 1400 people, and received hundreds of written comments from organizations and individuals during the public review period ending March 1, 1999; and  WHEREAS, the City has carefully considered the information provided and comments expressed in the public review process and has published its Final Environmental Assessment/Environmental Impact Statement for the HCP; and  WHEREAS, in March 1999, the City Council adopted Resolution 29905 laying out the elements of the City's early action response to the listing of Puget Sound Chinook under the Endangered Species Act and committing up to \$15 million for implementation of the proposal, including \$3 million for acquisition of habitat in the lower Cedar River Watershed; and  WHEREAS, in June 1999, the City Council held a public hearing on the Mayor's recommended changes to the Draft HCP; and  WHEREAS, the Cedar River Watershed HCP will enable the City to maintain the availability and quality of the region's primary water supply, meet the requirements of the Endangered Species Act, and resolve related issues with the state and federal governments; and  WHEREAS, the final HCP represents the culmination of more than five years of study to develop a comprehensive, scientifically-based plan to restore the diverse ecosystems of the Cedar River Watershed; and  WHEREAS, the City believes that the final HCP, incorporating the changes to the draft HCP specified in this Resolution, will be a national model for large-scale watershed protection and restoration that will leave a lasting legacy for fish, wildlife and people.  NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF SEATTLE, THE MAYOR CONCURRING, THA	1

1 2	requirements for an incidental take permit based on the policies, plans and commitments in the Final HCP, prepared pursuant to Section 1 of this resolution.
3 4 5	Section 3. The Mayor is hereby authorized to:
6 7 8	a) Submit, on behalf of the City, the Final HCP and other related documents, reports and information prepared pursuant to Section 1 of this resolution, to the USFWS and NMFS for their approval and issuance of an incidental take permit;
9 10 11 12 13 14	b) Sign and execute, on behalf of the City, the HCP Implementation Agreement, the Instream Flow Agreement and the Landsburg Mitigation Agreement, all substantially in the form contained in the Public Review Draft Technical Appendices to the Draft Cedar River Watershed HCP, and Environmental Assessment/Environmental Impact Statement, dated December, 1999, as any or all of them may be modified pursuant to Section 1 of this resolution.
16 17	Section 4. The Director of Seattle Public Utilities is directed to prepare and submit to the City Council one or more ordinances that:
18 19 20 21	a) Amend the 1999-2000 Budget of Seattle Public Utilities to provide for implementation of the HCP by increasing certain expenditure allowances, establishing certain additional positions, and proposing a "salmon surcharge" of no more than 3.5% on previously approved water rates for the year 2000;
22 23	b) Dedicate any net proceeds derived from sales of Seattle Public Utilities' surplus lands for the exclusive purpose of offsetting the costs of implementing the HCP; and
24 25 26 27 28	c) Amend Ordinance 114632 (Secondary Use Policies) to state that timber will not be harvested for commercial purposes in the Cedar River Municipal Watershed and dedicating any net proceeds derived from ecological thinning for the exclusive purpose of offsetting the costs of implementing the HCP.
29 30	Section 5. As part of implementing the HCP, Seattle Public Utilities shall submit the following reports to the City Council:
31 32 33 34 35 36	a) Within the first year of HCP implementation, a report identifying options and recommendations for administration of the downstream habitat program. The report shall include recommendations regarding relative priorities of acquisition vs. restoration projects and it shall also includes options for how the lands will be owned and managed, including partnership opportunities with nonprofit land conservation organizations; and
37 38 39 40 41	b) No later than five years after implementation has begun, a review and assessment of the road removal program in the HCP. The report shall address SPU's progress in meeting the program's goals and identify any recommended changes that should be considered in implementing the program, including the feasibility of removing additional road segments.
43 44 45 46	Section 6. Recognizing the importance of environmental education to the long term implementation of the Cedar River Watershed HCP, the Mayor and City Council hereby commit to allocate a total of \$4,000,000 from Seattle Public Utilities' Water Fund Capital Improvement Program (CIP) for the purpose of completing construction of the Cedar

7/12/99 V8 Education Center. for the hatchery. Section 8. While the purpose and function of the HCP is not to authorize or establish limits on the City's water diversions or to address the City's water supply planning process, there has nevertheless been citizen comment seeking to have the City ensure that some of the water appropriation by third parties.

River Watershed Education Center in 2001. These City funds are intended to supplement \$2 million in private donations that will be applied toward design and construction of the Center. SPU is directed to provide a status report on the Water Fund CIP program when it presents its 2000 water rate adjustment to the Council in the 3rd quarter of 1999. The report shall include a recommended construction schedule for the Cedar River Watershed

Section 7. In addition to the policy direction provided in Exhibit A, the Council recognizes the need to clarify the City's decision at this time in regard to the proposed sockeye hatchery on the Cedar River. It is the Council's intent to approve the hatchery project at this time contingent on completion of scientific and technical studies in Year 3 of implementing the HCP. At that time, it is recognized that the parties to the HCP (the City, NMFS, USFWS, and WDFW) will evaluate the scientific and technical studies and make a final decision regarding the design, capacity, operating guidelines, and adaptive management program

which it may be entitled to withdraw under its water right should instead be left in the river for the benefit of fish over the term of the HCP. Therefore, SPU is directed to include in the HCP a statement of its intent to develop and implement a legal mechanism such as a trust or other arrangement by which it can reserve, for the length of the HCP, one-third or 100 mgd of its water right claim (on an annual average basis) for the benefit of fish, subject to the following conditions: i) that the water so reserved is available to the City for emergency situations (natural disasters, pipeline failures, water quality events, extreme drought, and system failures); and ii) that the reserved water is protected from

SPU is further directed to include in the HCP a statement of its intent to reserve an additional one-sixth or 50 mgd of its water right claim (on an annual average basis) through the same mechanism and subject to the same conditions described above, and subject to the additional condition that the City receives appropriate assurances from the Muckleshoot Indian Tribe, including their full support of the HCP and their commitment to participate as good faith partners in developing other regional water supplies.

Prior to implementing the additional flow commitments described in this section, SPU shall submit the program and/or agreement to the Council for review and approval by ordinance.

Section 9. Final action to implement the HCP and related agreements is contingent on resolution of the administrative appeal that has been filed challenging certain aspects of the Environmental Impact Statement on the Draft HCP. Should any revision of the EIS be ordered, the City Council will reconsider those parts of the HCP and related agreements that are addressed by the revised EIS.
